

CPT 238 Assignment 5

Directions

Using the following guidelines, create a web page. Ensure to use the basic starting template, master.html.

1. Save the web page as assignment5.html
2. Ensure to download and place a copy of the jQuery library in the same folder as your other web page files.
3. The web page <title> should be Assignment 5.
4. Create an assignment5.css page.
5. Create an assignment5.js page.
6. In this assignment, you will be given the ability to create your own webpage design. Your webpage must meet the following minimum requirements:
 - a. Must have a theme, not just a bunch of random content.
 - b. CSS must be placed on the separate CSS page.
 - c. JavaScript and jQuery code must be placed on the separate JS page.
 - d. You must use at least four of the basic animation methods listed in Table 6-1 of your textbook.
 - e. You must specifically specify the duration argument of at least one of your animations.
 - f. You must use at least one Callback Function.
 - g. You must create at least one custom animation using the animate() method and you must animate at least two CSS properties.
7. This assignment will be graded as follows:
 - a. Page theme and structure – 25%
 - b. Page formatting, appearance, and CSS. – 25%
 - c. jQuery and JavaScript – 50%
 - d. Any missing requirement from step 6 is a mandatory grade reduction.
8. Test your web page and ensure it looks and works the way that you want.
9. Zip your files and submit into the Assignment 5 Drop Box.
